

## **Important Update: Interim Quota Allocation for 05 days**

**Dear Valued Customers,**

GMDC is presently conducting a structured Demand Mapping Exercise to assess the actual Lignite requirement of all its consumers. The exercise is currently underway and will take some time before the analysis is concluded and translated into an optimised, performance- and demand-based quota allocation.

In the meantime to ensure that your operations remain uninterrupted, GMDC has released a provisional quota for 05 days on an interim basis for May-26. The interim allocations are in-continuation with the existing allocation modality as per existing practice. Subsequent allocations will be made on the basis of the demand-mapping analysis once the exercise is completed.

Rest assured there is no shortage of Lignite and we will continue to serve the industries on best efforts basis. Our continued endeavour is to fulfil your fuel requirement economically, consistently and reliably.

Thanking You,

Marketing & Sales Department GMDC Ltd
